\u2665\u2665\u2665\u2665ing sad how easy this game

looks it doesn't even have\u2665\u2665\u2665\u2665\u2665in it,

i know it because i saw it.

I consider this trash for an 8 bucks game this\u2665\u2665\u2665\u2665\u2665should be free. Actually it should be permanently banned

for its \u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665 developers.. This has potential but is currently pretty rough. For starters, there is no way that I can find to exit the game other than forcing shutdown through windows task manager or taskbar. The physics in the game need help too: why do I get stuck to walls when I jump into them and why is the box puzzle on level 11 nearly impossible to complete? On the plus side, the music is catchy and it's relatively easy for young kids to play\progress until the box\spring puzzle.
